WDD 130

W08 - Challenge

Activity Directions

Estimated time: 20 minutes

Optimize the image provided. This challenge will not be creating a webpage like other challenges have been. We will use the image provided that is very large and optimize it to be a smaller sized image for use on a webpage. Right now this image would take a lot of time to load on your webpage slowing down the loading time and annoying your users, not to mention possibly using up their data.

Optimize the image so that it is around 1KB. Right now it is much larger, 1.6MB. You are welcome to work in groups. The image is provided below. If you've forgotten how to optimize images visit Step 08 of the [Getting Started](#) to review image optimization.

 rsz_teton_mountains.jpg teton_mountains_opt.jpg teton_mountains.jpg

teton_mountains.jpg

JPEG image - 1.6 MB

W08 image not optimized

 rsz_teton_mountains.jpg teton_mountains_opt.jpg

 teton_mountains.jpg

teton_mountains_opt.jpg

JPEG image - 110 KB

W08 image optimized
